

Environmental Policy

Waste Plan Solutions Ltd provides environmental consultancy to the construction industry, it is of vital importance to the company that we follow best practice and set a standard for our clients to follow. Waste Plan Solutions Ltd is involved in site waste management plan writing and training, as well as waste auditing for projects and offers waste awareness techniques to clients. Our objective is to integrate full environmental factors into all business projects with a view to enabling the company to contribute towards sustainable development. Waste Plan Solutions Ltd is committed in ensuring;

- Best practice environmental management between our clients and clearly demonstrate the possibilities of sustainability and resource efficiency, working within project constraints and maximising opportunities.
- The prevention of pollution and reducing any adverse impact of the companies operations on the environment and local community;
- Demonstrating efficiency in the use of energy, water and materials, as well as taking appropriate opportunities to minimise waste and re-use and recycle wherever possible;
- Compliance with all relevant environmental legislation, other environmental regulations and standards of relevance to the industry sectors in which we operate;
- Working in partnership with our suppliers to ensure effective environmental supply chain management and to promote sustainable sourcing of products and materials;
- Two-way dialogue with all who have an interest in our business, including staff, suppliers, customers, investors, shareholders, appropriate authorities, local communities and other organisations, to identify key environmental issues and to seek innovative solutions and appropriate alternatives;
- To design our services with sustainability and environmental standards as a key factor to our approach
- To support our clients in achieving their maximum sustainability within their company and projects.
